Slattery Re-elected School Trustee, 507 To 334

KELTZ MAKES GOOD SHOWING IN ELECTION

The election for grammar school trustee held yesterday in the Richmond school district resulted in the re-election of R. H. Slattery as trustee.

The total vote cast was 840 and of this number Slattery received 507 and Keltz, (write-in) candidate, 334.

The surprise of the election was the write-in candidate as no mention had been heard of one until Thursday.

In the different precincts a number of ballots cast for Keltz were rejected on account of his name being written in under that of Slattery, when it should have been written in the right hand column.

The following table in the adjoining column shows the vote in the different consolidated precincts.

New Ferry Service Is Launched

Headed by Ralph N. Bergen, chairman of the civic affairs committee of the chamber of commerce, a caravan of Richmond residents, prominent in civic and commercial affairs of the city, joined in the celebration of the increased ferry service between Richmond and San Francisco.

The caravan formed at Twenty-third street and Macdonald avenue at 10:30 o'clock and proceeded to the ferry. The 30-piece band of the Richmond Union high school furnished music and the huge truck transporting the members of the band bore two large banners which read: "Save Time and Money—Travel Southern Pacific via Richmond—the Scenic Route—Now! Thirty minute service."

Mayor To Review Police Squad In Annual Inspection

The annual drill inspection of the Richmond police department will take place next Saturday afternoon at two o'clock in the Lincoln grammar school yards. About 25 members of the local force will line up for official scrutiny. Chief of Police Cox, Captain L. E. Jones, Mayor Mattie Chandler and members of the city council.

MACHINES MEET
Cars driven by Raymond Alexander, 225 Cypress avenue, and Eva Herbst, 418 Fall avenue, collided at the intersection of Eleventh and Macdonald avenue last night, both cars sustaining slight damage. No one was injured.

Church Official Methodist Speaker

The congregation of Wesley Methodist Episcopal church, C. G. Lindemann, minister, will have the privilege at 7:45 o'clock of hearing Mrs. M. M. Northrup, National Field secretary of the Woman's Home Missionary society of the Methodist church. The church is fortunate in being able to secure Mrs. Northrup who happens to be spending a short time in this state. Her message is illuminating and inspiring, and is well received wherever she goes. The Richmond public is invited to hear this noted church woman.

Mrs. Anna Jarvis, 544 Twentieth street, will represent the ladies of the Grand Army of the Republic of Richmond at the convention in Long Beach.

OPERATOR OF AIRPORT HIT BY BIG SUIT

William Wright, said to operate an aviation field in Richmond, yesterday was named defendant in a \$50,000 damage suit filed in the superior court in Oakland by Mrs. Agnes Hamilton, widow of A. M. Hamilton, who was killed Monday evening when struck by Wright's car as he was crossing the street.

The suit charges that Wright was negligent in operating his car.

According to Phil Davis, Oakland auto dealer who was riding with Wright at the time of the accident, Wright was driving at a moderate rate of speed, and Hamilton stepped from behind another car directly in the path of Wright's car.

Wright gained his release Tuesday after having been held Monday night on a manslaughter charge.

THE SENATE AND NICARAGUA

The United States Senate, by refusing to vote for the withdrawal of American marines from Nicaragua, leaves our position in regard to that little nation a bewildering puzzle.

Nobody has the power to declare war, under the American Constitution, except the Congress of the United States.

The Senate in this case has not voted for war.

On the other hand, it has refused to end war.

American boys are shooting down Nicaraguans. Nicaraguans are shooting down American boys. American boys are capturing Nicaraguan towns and leveling some of them to the ground.

Nicaraguans are capturing American property and making prisoners of the owners.

This is war, and nothing else.

It is a situation in which the Senate should have taken a definite stand one way or the other.

One way that would make friends with Latin America would be to demand the withdrawal of our armed forces and by negotiation arrange for an honest and above-board election in Nicaragua.

The other way, and one that seems increasingly necessary, would be to declare war, appropriate money enough and send troops enough to win a victory that would command respect, and then turn the country over to its own voters for management.

The Senate by ducking both these issues has played "good politics" for its individual membership.

It has played bad politics for the United States in the world court of opinion.

When winter lingers in the gentle lap of spring, as the poets put it, its too bad the traffic cop can't order him to move on.

Two women traffic policemen have been posted in Constantinople. Well, it's a long jump from the harem to the little tower in the middle of the avenue but the Turkish women have finally made it.

The "glacial toda" found in Oklahoma and said by experts to be at least 300,000 years old and still living, is now said to be a modern fellow only two years of age. But what is a little thing like 299,998 years among scientists.

Big Bill Thompson says other cities have just as many crimes as Chicago but veil them. Well, of course it is pretty hard to veil a bomb.

Father—I get a good deal of consolation out of my twins.

Friend—How Come?

Father—Because they are not triplets.

Politics will never get to be really interesting until the states are able to swap their senators like the big league ball clubs trade their players.

Affairs of the Heart and Your Marriage Problems

Patricia Lee

Patricia Lee answers questions relating to problems of married life. Names and address should be added to letters as a mark of good faith but will not be published. Readers who desire private answers should inclose a stamped self-addressed envelope and 10 cents in coin to cover cost of typing, etc. Because of space limitations it is not possible to print answers to all letters received, and readers who wish an early reply should take advantage of this special service. On account of the large quantity of mail coming to this department, about ten days should be allowed for a reply. Write to Patricia Lee, care of this paper.

Dear Patricia Lee—

I am a young woman considered attractive. I am always neat, although I have three little children to sew for and look after, as well as the cooking and housework. Now, Miss Lee, I wouldn't mind the work so much if I only had a little affection from my husband. When I ask him why he doesn't kiss me, or put his arm around me, he says that men who do that are the ones that fool their wives. He says he doesn't have a kiss me to show that he cares for me, and he thinks I am terrible. I speak that way. My husband gets so strange to me that I accuse him of going out with other women and he gets very angry and won't speak to me for days at a time. Then my work seems twice as hard. I make sure I look my best all the time, and he sees it, but still he says he is not the affectionate type.

MADEIRAINE.

Dear Madeira—

Decidedly your husband is not the affectionate type! That seems to express it exactly. Now the point is, can you change his type or modify his feelings to make yourself happier? You can, a little, by forcing yourself on his attention, not as a woman, but as a pal. Some one who understands him, who laughs over every day happenings with him. Some one who doesn't bother him by trying to be affectionate, but who seems to say "We don't need to be demonstrative—just to be together is enough." You know, my dear, just between ourselves, men are just contrary animals. Let them see you want caresses and they'll give you anything else but. Let them think you don't care and they'll want to make you! And don't talk foolishly about other women.

WHY I BLUSHED

While riding in the train with my small son, a drunkard came on. My son asked me a question in a quite audible tone. Not wishing to be annoyed, I answered "Yes" and continued reading, only to be interrupted by the laughter of the passengers. I quickly asked my son to repeat the question. He said: "I asked you if you were ever drunk!"

RECORD-HERALD

Vigorous Health

A SPRING NOVELTY

"Matin" is a long cape designed in a new trend in black with white flecks. It has a deep collar, which is quite invisible. And it gives it a particularly snug appearance around the shoulders and two long side panels circular in cut, which are stitched about half way down the arms on each side. These panels give it a particularly graceful movement when the wearer is walking. The collar is of black satin with reverses reminiscent of the satin revers on a man's dress suit.

HOMESPUN YARN

Every now and then we feel called upon to sing the praises of the elastic stocking as one of the most satisfactory solutions to the problem of varicose veins and swollen limbs. So many "thank you" letters, come in from readers who have found relief through this type of hosiery that we would not be living up to our service slogan if we failed to pass the good word on. It is interesting to know that it is possible now to get a stocking which is quite invisible. And it costs no more than the old kind, which really was a burden to the wearer and, to say the least, not very pleasing to the eye. For best results elastic stockings must fit snugly, but not so tightly as to check circulation. Therefore, it is well to have them fitted by an expert.

It wasn't much fun being a little boy back in the early days of the century. "You mustn't mess your clothes" was a common phrase to your ears from more than till night. You wore plaits and ruffles, wide sleeves and fancy collars, and one could hardly tell you from your sister. But things are different nowadays. Youngsters are much better off for clothes are far more sensible, are more sturdy, and jads may romp and run to their heart's content. Parents are lucky too, for it is possible to get sturdy little suits, smart and well tailored, at the extremely low price.

While I was visiting my friends, house I took my cousin aged 41. I believe. It teaches dyeing, laundry work, textile chemistry, etc. My cousin remarked: "The know in a trade of this kind. I baby is biting it's mother's ear."

DADDY DUSK

In their wild scramble to pick the first daffodil of the season in Granny Benson's old deserted garden, the youngsters forgot all about the fact that they had walked almost four miles, most of it uphill, and that they might have complained of being tired.

Twin reached the daffodil just before the others and stood triumphantly over it much like Balboa must have stood as he looked out over the Pacific.

"I claim you, OH FIRST DAFFY OF THE SEASON!" she said, "in the name of Twin. Henceforth you are my property, to have and to hold, so long as you shall exist."

And then turning to the others she said: "I, Twin Morton, choose not to pick the first daffodil of the season. Here it shall bloom until such a day as it shall wither. Any one who dares to molest a yellow petal of its head shall die."

"Hear, hear, hear!" the others shouted. "The will of the conqueror shall be done."

"Mark the place," Twin commanded, and Twinkle found a huge pussy willow slip which she stuck into the ground beside the daffodil.

And then, triumphantly, she snatched up ahead of them.

I would like to have you advise me. I have always had the highest compliments on my feet and legs and I wondered if I could get anything to do posing for shoes and stockings, or anything in that line.

There are several studios for commercial photography in this city and the only thing to do is to register for several and wait until they call you. I warn you, that this may be a long time. On the other hand, the work is well paid. I would suggest that you look up the studios in the directory and visit many of them.

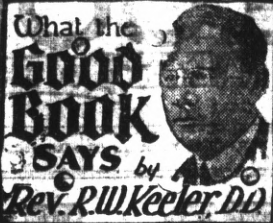

If any of my readers compose music, and would be interested in doing music for a revue, write to me. This is not professional, and the profit would depend on the success of your music.

SARA SPENCE.

I am anxious to sell real estate. Is it necessary to have a license, and where can I get one? Thanking you for any information you can send me, R. R. Many people are making a great success with real estate just at the present time, especially if they know their section. However, I would suggest that you write to the License Bureau.

Will you kindly tell me where I can learn dry cleaning? Thank you very much—G. N.

There is a school that would answer the purpose very nicely. I believe. It teaches dyeing, laundry work, textile chemistry, etc. My cousin remarked: "The know in a trade of this kind. I baby is biting it's mother's ear."

MOTORISTS INVITED TO DRIVE CARS

An invitation to local motorists to test an Oakland or Pontiac car has been issued by J. P. Strom, Richmond dealer. According to Strom:

"People are going to find out a lot about their motor cars in these fine days and nights for driving."

"There's nothing like a little drive into the country to reveal the truth about an automobile—good or bad."

"All of which suggests to us that you are one of a number of representative people here in Richmond whom we want to make acquainted with the new Oakland-Pontiac cars."

"Won't you let us give you a ride in one of these cars some day soon—or if you wish, place a car at your disposal for you to drive yourself?"

"Quite naturally we want to sell you a car some time, but you will not be annoyed by any high-pressure salesmanship from us. We have found that we succeed better by first giving the people an opportunity to know the car we sell and the things we do to assure satisfaction in ownership. Call us up, or stop in any day."

Review Is Made Of Butte Roads

That Butte county ranks well up among the good roads counties of California is the declaration of Ben Blow, field secretary of the National Automobile club who has recently completed a study of this section of the State. The total road mileage of the county, according to Blow, is 1331.73 miles. Of this 695.63 miles is gravel surfaced; 149.26 miles is bituminous macadam; 35.84 miles bituminous concrete; 3 miles surface treated water-bound macadam; 67 one-hundredths of a mile of Portland cement concrete; 234.32 miles improved with standard grades and drainage; and 263.61 miles of unimproved earth roads.

Plans for the extension of surfaced road mileage in the county will be in charge of County Road Engineer Harry H. Hume, and will call for wide radius curves with standard super-elevations and permanent culverts.

MANY AUTOISTS TURN ANGLERS

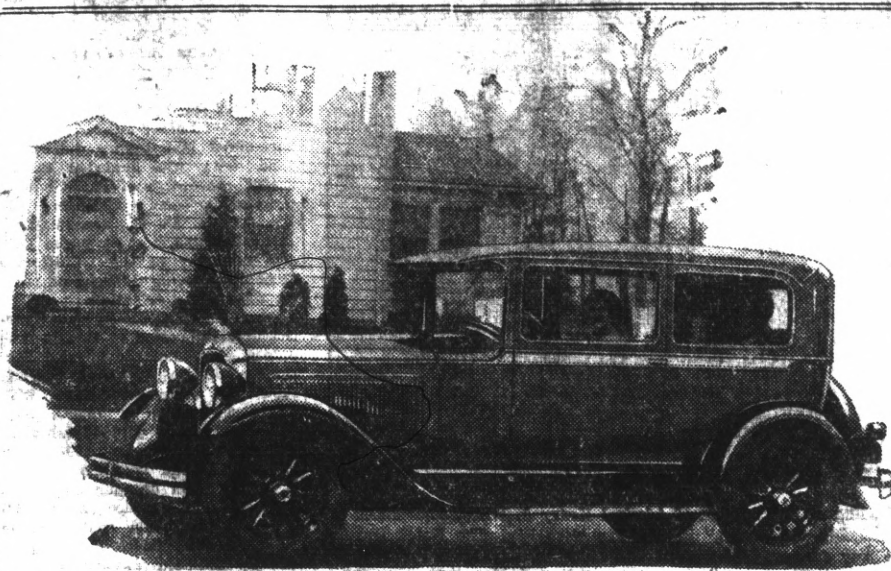

Thousands of motorists have become anglers with the opening of the fishing season May 1. Each year sees an increase in the demand on the association bureau for reports on fishing conditions in various localities as more motorists turn to the trout streams for the summer months. To these motorist-anglers, reports on fishing conditions are as important as those on road conditions.

The Association Touring Bureau has gathered a wealth of information on how they are biting in all parts of the State. This data is kept up to the minute throughout the season.

Motorists who start out with rod and reel are reminded not only to secure their licenses, which are issued by all association offices but to post themselves on the list of streams and waters closed for the season as a measure of propagation and conservation. This information may be secured from association offices.

Commander at Still Lower Price

THE COMMANDER Club Sedan, Studebaker's latest addition to this illustrious line of cars, is introduced at a new low price of \$1185. This is the lowest price at which the Commander's world championship performance has ever been available. It was the Commander that traveled 25,000 miles in less than 28,000 minutes at the Atlantic City Speedway last October.

Traffic Survey To Be Made In San Jose Area

Santa Clara county and San Jose officials have requested the state automobile association to conduct a traffic survey of San Jose and vicinity with a view to recommending remedial measures which will facilitate traffic flow and lessen hazards. The survey will be made by C. C. Cottrell, traffic engineer, who has conducted similar surveys for a dozen cities in northern and central California which have resulted in adoption of modern traffic codes to cope with increased congestion. Special attention will be given in the San Jose and Santa Clara county survey, Cottrell said, to a plan of coordination of city thoroughfares and main motor routes in the county leading into the metropolis of the Santa Clara valley.

There are more than 3,000 tractors, imported from America and Germany, in use in Turkey, according to a report received by the National Automobile Club.

STAY IN LINE, CHEVROLET IN IS ADVICE TO FIELD WITH CAR DRIVERS LOW PRICE CAR

CHICAGO, April 28.—In driving you increase your chances of an accident, 50 to 1, when you pull your automobile out of line.

Forty per cent of the automobile accidents fatal to children occur when a child runs out from behind a parked car.

These are among the conclusions of James S. Kemper, president of the Lumbermens Mutual Casualty company, Chicago. His judgment is based on an intensive study of over 10,000 automobile accidents in the past ten years.

"I don't mean that a driver should never cut his car out of line," says Kemper. "That would be ridiculous advice. It is constantly necessary to pull a car out of line. The purpose may be to turn or to pass another car. Circumstances may make it right and proper to do so."

"What I do mean is precisely what I say, that you increase your chances of an accident 50 to 1 when you cut out of line. Therefore you should do so only when absolutely necessary and with the greatest foresight and care. On a pedestrian vacation trip in the mountains you might have occasion to walk for a short distance along a narrow ledge with a sheer drop of a thousand feet. How foolish you would be to retrace your steps and do it over and over again! If you did, sooner or later you would probably slip or get dizzy and fall."

"That is what happens to the motorist who habitually pulls out of line. Sooner or later the accident probably catches up with him. By accident probability we mean the likelihood that an accident will happen under a given set of circumstances. That likelihood is 50 times greater when a driver is out of his place in the line of traffic than when he is in place. His exposure, as we call it, to an accident is increased 50 to 1."

Referring to an illustrated book on "Preventable Accidents" published by the Automobile Safety committee of the Lumbermens Mutual Casualty company, Kemper pointed out some road rules that bear on the dangers of pulling out of line:

"Keep your position on a hill; if you want to pass a car, do it on the level."

"Keep your place on a curve and do your passing on the straight-of-way."

"Let approaching car go by before passing car ahead."

"Follow line of traffic. Move straight ahead, not in and out."

The Lumbermens Mutual Casualty company devotes a large part of its extensive public safety work to the safety of children. "Because so large a per centage of the fatal accidents to children occur when a child runs out from behind a parked car," says Kemper, "parents and teachers should not stop with the time-worn advice of 'Look both ways before you cross the streets. They should add 'And never run out from behind a parked car!'"

In some downtown streets of Berlin, Germany, motorists may park their cars as long as they like at the rate of about seven cents an hour.

Twin Bridge Road Reported Good

The Placerville road between Sacramento and Lake Tahoe is open and in good condition to Twin Bridges, although the snow-line is encountered at Strawberry. There is still five feet of snow at the summit, but the California highway commission has a large crew at work on this road, and it is expected that it will be open for through travel over the summit by May 5. This, however, depends entirely on weather conditions between now and that time.

Wawona Road To Yosemite Open

Wawona Road, scenic mountain route into Yosemite valley, is now open. Winter conditions are rapidly disappearing from the Yosemite region and all mountain roads in this section except Tioga pass should be open to travel in the next week or so. The Big Oak Flat Road to Yosemite is expected to be open through to the valley soon. It is now open to Crane Flat. The All-Year highway into Yosemite is in excellent condition.

Huntington Lake Road Is Passable

The road from Fresno to Huntington Lake is open.

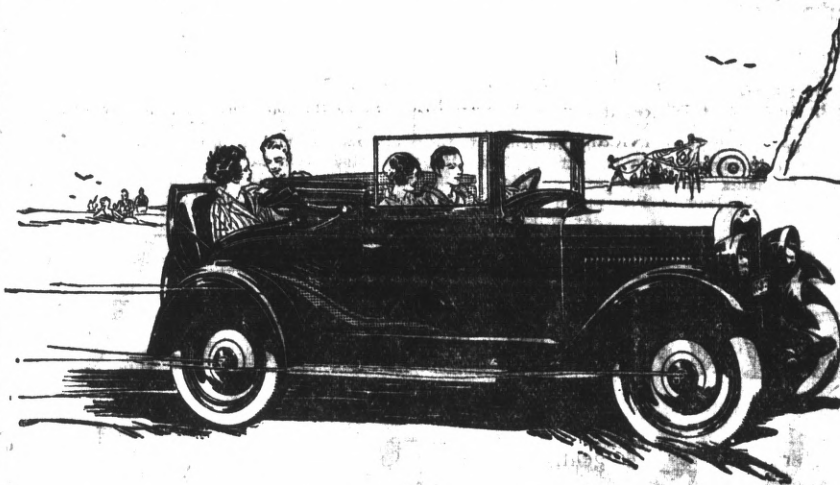

This road is in very good condition on sections of the road are being graded and there is considerable loose, soft dirt which might give trouble to heavy cars. There is quite a bit of snow on the last mile and the cabins and cottages around the lake are still snowed in.

This trip will not be advisable from a pleasure standpoint for another week or two, but those wishing to drive to the lake may do so, providing there are no further storms.

STUDEBAKER HAS SEVERAL NEW FEATURES

A new type flat steering wheel with spark, throttle and light controls on the top of the steering column suggest the ease of steering which Studebaker engineers have developed in the cam and lever steering mechanism. All instruments, including hydrostatic gasoline gauge, speedometer, ammeter, oil pressure gauge and engine thermometer are mounted under glass and indirectly illuminated. Another feature is a flood light over the coincidental lock to ignition and steering. Studebaker's coincidental lock was recently responsible for a nation-wide reduction in their insurance rates on Studebaker cars.

The low swung body, long chrome vanadium springs and hydraulic shock absorbers make the new Commander Club Sedan an exceptionally easy riding car. The inclusion of hydraulic shock absorbers is a striking example of Studebaker's One-Profits value.

Coupled with The Commander's great horsepower—its rated horsepower exceeds that of any other car under \$1000—is its exceptional gasoline economy proved by 61 tests which established a nationwide average of 17.14 miles per gallon.

Studebaker also announces The Dictator Club Sedan at \$1195 f. o. b. factory.

The offering of The Dictator at this price is another triumph of One-Profits building," said L. J. Thomas. "The new Dictator Club Sedan is finished in Olivet Green with Old Ivory panels and bright Platinio Carmine striping. The interior is finished in grey velvet with carpet and curtains in harmonizing shades. Standard equipment includes hydraulic shock absorbers."

Bishop, Mono Lake Route Again Open

The Deadman Summit on the route between Bishop and Mono Lake is open again and many machines are negotiating it. However, cloudy weather is reported in that district and further snow may occur, making it advisable for motorists contemplating this trip to carry chains and make local inquiry before leaving Bishop.

Short-Cut To Amador To Be Put In Shape

The first 35 miles of the Chico-Lake Almanor short-cut road, extending from Chico to Butte Meadows will be in excellent condition when the touring season opens. The next five miles, from Butte Meadows to Jonesville, will in all probability be rather rough but from Jonesville to the summit of the hill, which is the county line, the road will be good, connecting with the Plumas county section which will be in very fair condition.

This route supplies a cut-off for travel originating in valley points south of Chico and destined for Lassen park and Lake Almanor which is 40 miles shorter than the route by the State highway. In addition, it will, when plans for a further improvement are put into effect, open up one of the finest deer and trout sections of the State, the Deer Creek section in the upper reaches of Deer Creek canyon.

A good part of the line lies within a National forest, and government road money will aid in improving the road.

NURSES ENTERTAINED AT MADIGAN HOME

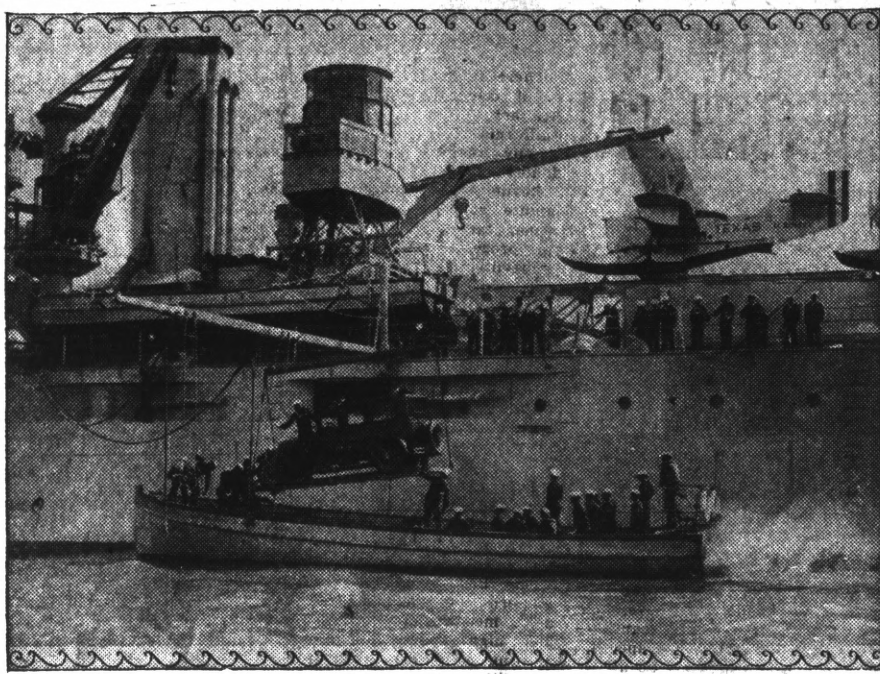

The nurses of the Richmond association of nurses were entertained Friday evening by Mrs. A. Governor and Mrs. J. B. Madigan at Mrs. Madigan's home, 904 Chabot avenue. The evening was enjoyed with whist, after the games were over a dainty lunch was served by the hostesses.

The ladies present were: Miss Agnes Driscoll, Miss Esther Sanders and the Mesdames Elizabeth Redmond, J. Gardella, H. K. Yond, Charles Mahke, Charles Kennedy, Lester Kerfoot, H. Pruvance, F. Gates, L. G. Bussey, J. Merkel, E. B. Fitzgerald, H. Ahern, J. Larison, L. Mengerle and the hostess.

SURPRISE PROMISED OF YEOMEN'S MEET

A meeting will be held Monday evening in Woodmen's hall, and members of the Richmond home-stead of Yeomen are promised a big surprise if they attend the meeting. Mrs. Margaret McCain will preside. Plans will be completed for May 14, when mothers' day will be observed.

Funds Provided To Fix Roads At Presidio

Motorists who enjoy driving over the roads through the military reservation along the northern shore of the Golden Gate will welcome the news that \$57,000 has been appropriated by Congress for improvement of these routes. The sum was provided in the army appropriation bill for Fort Baker roads at the request of Congressman Lea. Word that this appropriation was included in the bill as signed by the president was received by George S. Porderer, treasurer of the Automobile association, who has been following this matter closely.

HIGH SALE MARK SHOWS POPULARITY

The immense popularity of the three Graham brothers' latest product, the Graham-Paige line, is attested by the fact that 159 Graham-Paige cars were sold this month in the 47 Northern California counties as compared to 78 for March 1927; this is an increase of slightly more than 100 percent. Graham-Paige sales in San Francisco jumped from 36 in March to 64 for the past month. Alameda county sales for March increased from 78 to 59. The increase for the State was 75 percent; 168 Paige cars were sold for the month last year, and 294 for this March, according to Harry Semar, local Graham-Paige dealer at 1412 Macdonald avenue.

Although the Graham-Paige factory was unable to begin production on the new line until late in January, only 1497 cars being produced in that month, the figures for the first quarter of 1928 equal 60 percent of the entire output, which was 21,881 cars. January 20, the 200th Graham-Paige car was built; two months later, March 20, the 10,000th Graham-Paige came off the production line and at the close of March the total production for the first quarter amounted to 13,139 cars.

March production totaled 7616, more than a third of the entire 1927 output, 30 percent more automobiles than were ever before produced in any March by this factory. Previous to the establishment of the March record, May, 1925, when 5841 cars were constructed, was the best month in the factory's 18 years of automobile manufacture. The largest single day's total last month was 384 machines, also a new record.

The record is all the more noteworthy in that it was established with full production on only three of the five models comprising the Graham-Paige line. The fourth model, a six-cylinder 114-inch wheelbase automobile, was put into production about the middle of the month, but is just now swinging into a large output. It is second lowest priced car in the line, and as it is the lowest priced car in the automotive industry to be equipped with a four-speed transmission, it should greatly increase the factory totals during April. The straight eight on a 135-inch wheelbase will shortly make it debut, when its prices will be announced.

NEW OFFICES ARE OPENED BY MOTOR BUREAU

Opening of district offices of the California State Automobile association in Auburn and in Placerville, in pursuance of its policy of bringing the personal motoring services of the association closer to members in all parts of the state, was announced today by Fred W. Dewey, Jr., field secretary of the motorists' organization. "This policy of expansion of our district office system as rapidly as is practical has resulted in a steady increase in the number of points of contact with association service available to touring motorists," said Dewey.

"Association offices were opened in Madera and Hollister recently and extension of the district office chain to Auburn and Placerville increases to sixty-five the number of contact points in our state-wide blanket of service. There are now thirty cities in northern and central California with association offices and complete association service is also available to association members at offices of the automobile club of Southern California in thirty-four cities of the south. A summer touring bureau office is also maintained in Yosemite Valley."

The Auburn district office will be housed in a building under construction at 943 Lincoln way, but meanwhile is occupying temporary quarters with the chamber of commerce in Auburn. L. P. Voltz, who has been association representative in Auburn, is manager. The office will serve association motorists residing in or traveling in Placer, Nevada and Sierra counties.

The Placerville home of Association service is located on Main street and its district is El Dorado county. Frank R. Hull, formerly association representative at Grass Valley, is manager.

Growing membership of the association in the counties served by these two new offices and the increase of motor touring in the Lake Tahoe and adjacent Sierra region were factors dictating the establishment of these new homes of service. Both are located on main routes of intrastate and transcontinental travel.

MANY JOIN IN NATION WIDE SERVICE CLUB

Integral parts of a nation-wide network of motoring service units serving more than a million member motorists, the affiliated clubs of the American Automobile Association now number 1064 forming the largest organization of motorists in the new world. That the total of A. A. A. member clubs had topped the thousand mark was reported to the recent convention of Three A club secretaries and managers in Washington, D. C., according to D. E. Watkins, secretary and general manager of the California State Automobile Association, who attended the convention.

"California motorists are particularly interested in this growth of organized motoring," said Secretary Watkins, "first because their own state association, with a membership of 76,000, continues its point of leadership as the largest of these 1064 affiliated clubs and secondly because it makes even broader the scope of nation-wide service at the disposal of California motorists."

"When you become a member of an affiliated association, you have joined an organization of 1064 automobile clubs, the component parts of the only nationwide organization of motorists, or south, you encounter the rest of the A. A. A."

"Whether you travel east, north, west or south, the reciprocal service territories of the links in a great chain of motoring service. The service fields of these 1064 clubs blanket the nation. They are located in every state and in every center of population. The reciprocal exchange of courtesy services between these motoring organizations gives the Three A motorist the confidence that service rides at the wheel with him throughout the nation."

"Not only are the touring and other services available to the California Association motorist, but emergency road service is now on a nation-wide basis as the result of an agreement for reciprocal club exchange. This service is free east of the Rockies and at a nominal cost in western states where distance and mountains are factors. In California, the association motorist has state-wide free emergency road service, as heretofore."

El Dorado County To Widen Road

Highway funds in El Dorado county which amount to about \$90,000 a year, are being largely expended in widening the narrow mountain roads.

In many cases the existing mountain roads in this county, such as are off the main line of travel, are so narrow that it is impossible for two cars to pass. Narrow places where the element of danger is found are to be taken care of first, and eventually the whole historic area where the Gold Rush centered in the days of '49 will be supplied with wider roads.

Campfire Girls Plan For Outing

The Campfire girls of the Laguna group held a swimming test in the natatorium Friday evening instead of their regular meeting. Miss Maud Wood was in charge of the outing. Those winning rank were Juanita Cole, frog and fish; Catherine Redcliffe, pollywog; Anna Shaw, fish; and Miss Maud Wood, fish. As it is the girls' duty to teach the pollywogs, lessons were given to Dorothy Patterson and Edna Hoefler, of the Yulupa group, who won frog rank.

NOVEL IDEA IN CAMPAIGN FOR CHRYSLER CAR

A national campaign has been launched by the Chrysler Sales Corporation to acquaint the general public with the performance of the modern automobile, according to Harry Curry, local dealer. "Hundreds of thousands of small stickers will be seen throughout the United States," bearing the slogan: "Be our guest at the wheel of a Chrysler '62,'" Curry declared.

"The performance of the present-day automobile," he continued "as compared with the automobile of five or six years—is as different as the old one-cylinder car when compared with the 1920 six-cylinder automobile."

"One of the chief reasons for this superior performance is the advanced development of the latest type high-compression motor, in which Walter E. Chrysler has led the way since he first announced the Chrysler '70' model to the public four years ago." Curry points out that it is almost impossible to explain by word-of-mouth the feeling of satisfaction experienced when sitting behind the wheel of a modern car, which is powered by a motor developed after years of research work by some of the best mechanical engineers in the country.

NOBLE GRAND WHIST WINNERS ANNOUNCED

Holders of high scores of the Past Noble Grand association whist party, held last night in Odd Fellows hall, were announced as follows:

STUDEBAKER The Great Independent

A New Record for stock cars under \$1400

Better than a mile a minute for 5000 miles

The Dictator \$1195 to \$1395

BY traveling 5,000 miles in 4,751 consecutive minutes, the Studebaker Dictator has established a record unequalled by any stock car under \$1400—comparable to the existing world record of 5,000 miles in 4,559 minutes made by The Studebaker Commander last fall.

And not one, but two Dictator Roadsters, fully equipped, each traveled 5,000 miles in less than that number of minutes. The run was made at the Atlantic City Speedway, April 20-23, under the supervision of the Contest Board of the American Automobile Association. Before and after the run, the cars were checked by the Technical Committee and were pronounced strictly stock models.

CLAIMS vs. FACTS

Automobile advertising is full of extravagant claims of performance. But Studebaker offers you definite FACTS supported by the certificate of the highest motoring authority. Under A. A. A. supervision

The Commander has made a record never approached by any other car on earth (25,000 miles in less than 23,000 minutes). The Erskine and The Dictator have made records unequalled by any other stock cars at or near their prices.

The high quality of materials, the precision workmanship, the rigid inspections and the engineering genius in the Studebaker Dictator are proved not only by its ability to travel 5,000 miles in less than 4,800 consecutive minutes, but also by the fact that any Dictator can be driven 40 miles per hour as soon as it leaves the assembly line at the factory.

Backed by Studebaker's 76-year reputation for quality and value, The Dictator offers champion performance at a low One-Profits price.

Values in Four Price Fields

President Eight, \$1985 to \$2485; The Commander, \$1435 to \$1625; The Dictator, \$1195 to \$1395; The Erskine Six, \$795 to \$965. All prices f. o. b. factory.

GIRL SPANKED AS SHE MAKES CANADA FLIGHT

Olive Borden's new starring vehicle, "Pajamas," has been "dressed" with some of the most attractive interiors ever designed for a comedy drama, according to Director J. G. Blystone who supervised the erection of Long Island residence scenes. Fox not only built a complete home, in keeping with the ideas of New York multi-millionaires, but further enhanced the set by surrounding it with a garden and swimming pool wherein Miss Borden could entertain scores of guests over the week-end.

These little gatherings lead to grief, however, for father gets tired paying the bills and calls for a showdown. Then Miss Borden makes a daring flight to Canada, wrecks an airplane, and gets the shock of her young life when Lawrence Gray spunks her for her perversity. How Gray wins the love of the girl furnishes a smashing climax which is altogether new in pictures.

"Pajamas" will be the screen feature at the California Theatre today.

Other features on the same program include "Ain't Nature Grand," a roaring comedy; current news events; and five big acts of road show vaudeville.

BUICK MOTOR PATTERN FOR BRITISH CAR

The thousands of Buick owners in California and the more than a million enthusiastic drivers in these famed cars in American will feel a glow of satisfaction in the announcement just received by C. C. Kratzer, Richmond dealer, that England's most expensive motor car, Rolls-Royce, has recently adopted the valve-in-head engine. Besides confirming the judgment of the Buick Motor Company, which pioneered that type of power plant and now offers it as its finest in the Buick models, the announcement is a tribute to the discrimination of every Buick owner.

This British car's similarity to Buick does not end with the engine, but includes also cellular radiator, worm and split-nut steering gear, torque tube drive, floating rear axle, and cantilever springs. Comparison of specifications tends to support the already overwhelming evidence—collected by 2,000,000 Buick owners—in favor of these advanced details of engineering.

A point of more than passing interest in the opinion of Buick officials, is the fact that this prototype of Buick sells at a much higher price than Buick. The explanation is two-fold. The Rolls-Royce is of course a much larger and heavier car, and naturally costs much more to manufacture. That accounts for a large part of the difference. In the second place, each of the features listed is more costly than the corresponding part in cars of conventional design. In the aggregate represented by the completed car, the difference becomes very great.

AUTO DOLLAR VALUE TODAY BUYS GREATER

"While the purchasing power of the dollar is still far below its pre-war value, the automobile dollar is increasing in value, states George Olson, local Chandler distributor.

"Taking the value of the automobile purchasing dollar in 1924 as 100 cents it had risen to 113 cents in 1926" states Olson. "During the same period the cost-of-living dollar had dropped to 60 cents.

"Selling costs have mounted, labor costs have increased, raw materials prices have advanced—yet the present day motor car manufacturer produces a better automobile than formerly and sells it for less money.

"While this may sound impossible, it is nevertheless a fact and has been brought about by quantity production and the introduction of more modern factory methods. The manufacturer now produces a quality product in enormous quantities at a smaller cost per unit and can afford to realize a smaller profit per unit.

"In 1913 if a farmer wished to buy an automobile and pay for it in wheat he would have had to give 1,562 bushels for a car which today he can purchase for the value of 780 bushels, or about 50 per cent less. If he paid for the car in other farm products, the saving would be practically the same.

"This decrease in the price of motor cars has a profound economic effect which is far-reaching. It has enabled thousands to enjoy the pleasures and conveniences of motoring, who never had the opportunity before. It has, of course, increased production, there by providing for additional hundreds of thousands in the industry for the furtherance of national prosperity.

"To the individual owner," Olson concluded, "savings through this greater value of the auto dollar accrue not only in the form of lower initial cost, but also in decreased replacement expenditures and lower cost per mile throughout the entire period of operation."

FLYING SPARE TIME HOBBY OF REGGIE DENNY

Reginald Denny, star of "Out All Night," the Universal Super-comedy which will open at the Richmond theatre today, plays as hard between pictures as he works during production.

Various recreations have held his attention from time to time but he is first and foremost a sportsman. He loves everything that an outdoor man does.

He has always been a fisherman and a hunter. One of the first hobbies to occupy his attention was flying. He was in the Royal Flying Corps during the war and he learned to be a pilot. After the war, the first spare money he saved went to buy a plane. He has flown all over the Southwest and Mexico in it.

Then he bought a racing automobile and entered a few races. After that, hunting occupied his time. He hunted mountain lions in the high Sierras and wild boars in the San Clemente islands.

After his recent illness he decided to spend a more placid life until he had completely recovered, so he built a large hunting lodge in the San Bernardino mountains where he goes into seclusion. Here his friends gather, but there is no telephone to remind him of the outside world. From the porch he can gaze out over 50 miles of mountain ranges.

Supporting Denny in his latest farce, "Out All Night," are Marion Nixon, Ben Hendricks, Jr., Dorothy Earle, Lionel Braham, Dan Mason and Wheeler Oakman. William A. Satter directed.

Other film features include "Rushing Business," a roaring comedy; and a Grantland Rice "Sportlight."

STEEL BLAST WRECKS PLANT CALIFORNIA CAP

An explosion in an isolated laboratory at the California Cap works, in Stege, shortly before 11 o'clock yesterday morning caused damage estimated at \$1000 by A. H. Campbell, plant superintendent. No one was injured.

The magazine was used by the plant chemist, J. A. Hammond, for storing quantities of chemicals, many of an experimental nature and no one was permitted to work in the building.

After the explosion, nothing was left of the iron roofed frame building but charred ruins. The damage is believed to be covered by insurance.

In answer to an alarm, fire engines Nos. 3 and 4 and truck No. 1 responded but there was little need as the building was isolated from the others on the 60-acre tract near the waterfront.

The Kalamazoo gent who shot his son-in-law for a rabbit may have known the boy pretty well, at that.
